# Animals should not be in captivity because...

- Animals become depressed because they have been in cages all their lives.
- When animals escape their cages they harm and kill people.
- Good zoos should not keep animals just for entertainment.
- Keeping animals in captivity is like keeping innocent people in prison.

# Animals should be free.

Animals are happier in the wild. Animals have rights too! when they are in the wild, they have more room to do things.

- Animals are bound to suffer.

# Animals should be in captivity because...

- Animals that are endangered are protected in captivity.
- If animals are in captivity, there predators can't eat them.
- Animals that are endangered don't go farther and become extinct. They don't become endangered if they are in captivity.
- If your favorite animal is a panda they will survive because they are protected by zoos and they won't die.
- Some animals live longer if they are in captivity.
- Animals can be protected even though they feel depressed.
